

Interoffice Memo

# LONE STAR INDUSTRIES, INC.

One Greenwich Plaza, Greenwich, Connecticut 06830

Originating Office: Seattle Cement Plant

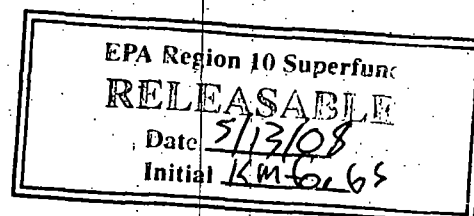

Date: October 17, 1983

BUSINESS CONFIDENTIAL

TO: A. C. Imhoff

FROM: K. J. Rone

SUBJECT: Activity Report - Week Ending 10-16-83

1. Need decision on Mr. Williamson's replacement, #14 kiln tire, sand unloading station, litigation against Corps over marina.
2. Kaiser Cement commissioning architect to design 12,000 ton cement barge. Also found 60ppm ethylene glycol in Alaskan sample of Kaiser Type "G".
3. Kiln computer received. Beginning hookups and operator orientation.
4. Precipitator performing adequately after programmable controller was installed to control de-energization during shake cycle.
5. OPC delivering to our old exchange customer, Genstar - Portland Terminal.
6. Met with Mr. Lancaster and Mr. Alston to discuss \$50M charge by Builders Concrete. Based on our data substitution of Type III for Type III-M, was approved by Mr. Lancaster. Their production at constant slump produced much lower strength. They also did not change their mix design when the strength spec increased 25%. Will await Mr. Hawley's input. Builders is a 400-ton/month customer.
7. Made 6-hour test burn of TDF. Kiln temperature profile shifted to feed end of kiln.
8. No grievances, accidents or visitors.
